## SUMMARY

Software Development Engineer in Test with 2+ years of experience automating and certifying revenue-critical, full-stack products at scale. Currently at BrowserStack: ~970 automated test cases, Nightwatch → Playwright migration, QA Owner for 7 P0 and 11 P1 online-sales features, and 70+ bugs caught including production lead-loss defects. Known for code-level root-cause analysis across Rails/React codebases and building CI-integrated, reliable automation with AI-assisted workflows (Claude Code, MCP).

## EXPERIENCE

- BrowserStack Software Private Ltd**

*Software Development Engineer in Test*

Remote

Nov 2025 – Present

  - Wrote ~970 automated test cases (~505 Playwright, ~470 Nightwatch.js) in Cucumber BDD with 734 step definitions for checkout, pricing, lead-capture and lifecycle-email flows.
  - Closed coverage gaps across 11 Growth modules: Contact Sales/Demo form (form → Salesforce lead → RevenueHero booking), Checkout, Pricing Page, Webinars (90%→100%), Pipe CTA leads, Abandoned leads, Lifecycle Emailers (48/52), Speedboat touchpoints (124/150) and Hello Bar (33%→100%).
  - Migrated ~260 test cases from Nightwatch to Playwright (V3 checkout, redirection, V4.2 switch-to-annual, App Live intro) with 26 page objects, and integrated the suites into Jenkins CI.
  - Drove “Regression Under 30 Mins”: consolidated 52 feature files into 17 with all 7,976 scenarios preserved, replaced 799 hard waits with polling and cookie auth; fixed 350+ failing cases, raising regression stability from 87% to 95%+.
  - Shipped Ruby on Rails code (2 merged PRs): prod-guarded test endpoints making ~14 Sidekiq/cron-only emails automatable.
  - Raised 70+ bugs (40 in Jira incl. 3 P0s): contact-sales form silently dropping leads, staging traffic creating real prod leads, and paywall downgrade firing after the 5th failed payment instead of the 2nd.
  - QA Owner for 7 P0 / 11 P1 features (paywall, pricing experiments, lead-drop mitigation, Freshchat validation); Deploy SPOC for 17 prod deploys incl. a build-break revert and a rollback.
  - AI-first workflow: built Claude Code skills for PR-quality review (flags 10 test anti-patterns) and nightly regression triage to Slack; used MCP (Jira, Slack, GitHub, Test Management) to bulk-classify 150+ test cases.
  - Owned 189 Jira issues (160 shipped, 356 SP), 329 code PRs and 153 reviews; 11 Empuls awards (Extra Miler ×4).
- Cisco Systems Inc**

*Software Engineer Trainee*
- Bengaluru, India

Aug 2024 – Sept 2025
- Developed 125 tests and refactored 102 legacy tests to achieve 100% pass rate; boosted test coverage by 25%.
  - Identified and fixed 66 critical bugs including 21 release blockers within 8 months.
  - Raised test pass percentage from 65% to 96% by redesigning the framework with clean code practices.
  - Spearheaded testing and certification for full modules, executing automation end-to-end.
  - Led performance engineering for the AppDynamics Controller 25.7 release; escalated a critical release blocker.
  - Received Connected Recognitions from leadership up to INR 48,000.

## SKILLS

- Languages:** JavaScript (Node.js), Java, SQL, Basic Python
- Automation & Tools:** Playwright, Nightwatch.js, Cucumber BDD, TestNG, Percy (visual testing), API Testing, Postman, Apache JMeter, JIRA, Git/GitHub, Jenkins (Groovy job DSL), TeamCity, Copilot, Cursor, Claude Code, MCP
- Product Stack (RCA):** Ruby on Rails, MySQL, Zuora billing, Amplitude
- DevOps:** Linux, AWS, Docker, Kubernetes (staging envs), Splunk, AppDynamics

## EDUCATION

- Jawaharlal Nehru Technological University**

*Bachelor of Technology in Computer Science and Engineering; CGPA: 7.52/10*
- India

2019 – 2023

## PROJECTS

- Alerting Tool (Cisco AppDynamics):** Automated generation, monitoring, and reporting of AppDynamics health rules across performance testing stages.
- Rezum:** Resume builder website with customizable templates using Spring Boot, Spring Security, and Thymeleaf.
- Tech Bay:** Spring Boot e-commerce app with complete store functionalities.
- AI Text Summarizer App:** Summarized long texts using Hugging Face APIs (Bart Large CNN), integrated via Postman.

## CERTIFICATIONS

- Cisco:** DevNet Associate (2025), CCNA (2025)
- Cloud & Testing:** AWS Certified Cloud Practitioner (2023), Postman Student Expert (2024), Java – HackerRank (2024)
